

## One Appliance, One Package, Total Security

Simplicity is our mission at WatchGuard and that mission extends beyond how the product is built to how it is packaged. While all of our services are offered à la carte, we have worked to develop two packages that simplify the decision-making process. The Total and Basic Security Suite packages are only available on our Firebox T and M Series appliances. Similar packages can be custom-created by our Partners for XTM and XTMv customers, however, we are always running promotions to encourage our customers to trade-up to the latest hardware to enjoy the fastest performance and strongest security.

- The **Basic Security Suite** includes all of the traditional network security services typical to a UTM appliance: IPS, GAV, URL filtering, application control, spam blocking and reputation lookup. It also includes our centralized management and network visibility capabilities, as well as, our standard 24x7 support.
- The **Total Security Suite** includes all services offered with the Basic Security Suite plus advanced malware protection, data loss protection, enhanced network visibility capabilities, and the ability to take action against threats right from Dimension, our network visibility platform. It also includes upgraded Gold level 24x7 support.

Product	Support	TOTAL SECURITY	Basic Security
